

Enrolment beyond 2019

There is currently a surge in the building of apartments in Glen Waverley and the demand for places in the College is expected to increase as a result of this situation.

Many of these apartments will not be completed for a number years. Given this situation the College can only refer families to the current enrolment policy issued by the Department of Education and Training.

When we are considering enrolments at the College the main criterion is that the applicants live permanently in the neighbourhood area at the time of enrolment and that they will continue to live within the neighbourhood area for the duration of the students' time at the College.

Every application for enrolment at the College will be considered individually and assessed on the information available at the time of application. It is not possible to give a definite answer to an enrolment enquiry in 2019 when the enrolment may not occur for many years into the future.

Enrolment enquiries for 2019 placement will be considered individually based on the current enrolment procedures.
